Projects

Employee management system

A web application built using React.js and Tailwind CSS to manage employees and their assigned tasks. Implemented features like Add/Update/Delete employees, task assignment with status tracking (New, Active, Completed, Failed), and data persistence using localStorage. Designed a clean and responsive UI with Tailwind utility classes. Focused on state management in React, conditional rendering, and improving user experience. Future scope includes integrating backend & authentication for role-based access.

Country Explorer

Developed a responsive web application using React.js, React Router, and Fetch API to explore countries data. Implemented search, filter, and dynamic routing with reusable components and custom CSS styling for a clean user experience.
